WATER LINE HEATER

Diesel-fired or propane fired heaters that will protect drillers against waterline freeze up.

- > Heavy duty 4 point lifting frame for heli-portable fly jobs
- > Large ID heater coil tested to with stand 1500 PSI Pressure
- > Quickly heats up pressurized water

STANDARD FEATURES

Heater coil tested to withstand 1500 PSI pressure

Converts from 12 Volt DC, 110 Volt AC or propane-fired burner in minutes

Heavy duty 4 point lifting frame

Plug in accessories and safety equipment

Hinged all weather burner guard

Tilt up frame for draining water and easy burner changes

Dimensions 32" H x 27" W x 51" L

Weight 275lbs / 125kg

OPTIONAL

12 Volt DC Diesel Burner - Fuel Consumption 1.00 to 2.25 gph

110 Volt AC Diesel Burner - Fuel Consumption .50 to 3.00 gph

Propane fired torch unit c/w regulator and line kit

Emergency shut down switch

High limit automatic heat shut down sensor

Water flow shut down sensor

Furnace by pass switch

16" foam filled rubber tires

ATV trailer hitch
